

32. Count Positive and Negative Numbers

```
#include <stdio.h>
```

```
int main()
```

```
{
```

```
    int n, num;
```

```
    int positive = 0, negative = 0;
```

```
    printf("Enter number of values: ");
```

```
    scanf("%d", &n);
```

```
    printf("Enter numbers:\n");
```

```
    while (n--)
```

```
    {
```

```
        scanf("%d", &num);
```

```
        if (num > 0)
```

```
            positive++;
```

```
        else if (num < 0)
```

```
            negative++;
```

```
    }
```

```
    printf("\nPositive numbers = %d\n", positive);
```

```
    printf("Negative numbers = %d\n", negative);
```

```
    return 0;
```

```
}
```

Output

```
Enter number of values: 6
Enter numbers:
10 -5 20 -8 15 -2

Positive numbers = 3
Negative numbers = 3
