

33. Validate URL

```
#include <stdio.h>

#include <string.h>

int main()
{
    char url[200];

    printf("Enter URL: ");
    scanf("%s", url);

    if (strncmp(url, "http://", 7) == 0 ||
        strncmp(url, "https://", 8) == 0)
    {
        if (strchr(url + 7, '.') != NULL ||
            strchr(url + 8, '.') != NULL)
            printf("Valid URL\n");
        else
            printf("Invalid URL\n");
    }
    else
    {
        printf("Invalid URL\n");
    }

    return 0;
}
```

Output

```
Enter URL: https://www.google.com
Valid URL
