

37. Frequency of a Word in a Sentence

```
#include <stdio.h>

#include <string.h>

#include <ctype.h>

int main()
{
    char sentence[300];
    char target[50];
    char word[50];

    int i = 0, j;
    int count = 0;

    printf("Enter sentence: ");
    fgets(sentence, sizeof(sentence), stdin);

    printf("Enter word to search: ");
    scanf("%s", target);

    while (sentence[i] != '\0')
    {
        if (isalpha(sentence[i]))
        {
            j = 0;

            while (isalpha(sentence[i]))
                word[j++] = sentence[i++];
```

```

        word[j] = '\0';

        if (strcmp(word, target) == 0)
            count++;
    }
    else
    {
        i++;
    }
}

printf("\nFrequency of '%s' = %d\n", target, count);

return 0;
}

```

Output

```

Enter sentence: hello world hello student hello
Enter word to search: hello

Frequency of 'hello' = 3
