

39. Replace a Word with Another Word

```
#include <stdio.h>

#include <string.h>

int main()
{
    char sentence[300];
    char oldWord[50];
    char newWord[50];
    char result[500] = "";

    char *pos;
    char *start;

    printf("Enter sentence: ");
    fgets(sentence, sizeof(sentence), stdin);

    sentence[strlen(sentence)] = '\0';

    printf("Enter word to replace: ");
    scanf("%s", oldWord);

    printf("Enter new word: ");
    scanf("%s", newWord);

    start = sentence;

    while ((pos = strstr(start, oldWord)) != NULL)
```

```

{
    strncat(result, start, pos - start);
    strcat(result, newWord);

    start = pos + strlen(oldWord);
}

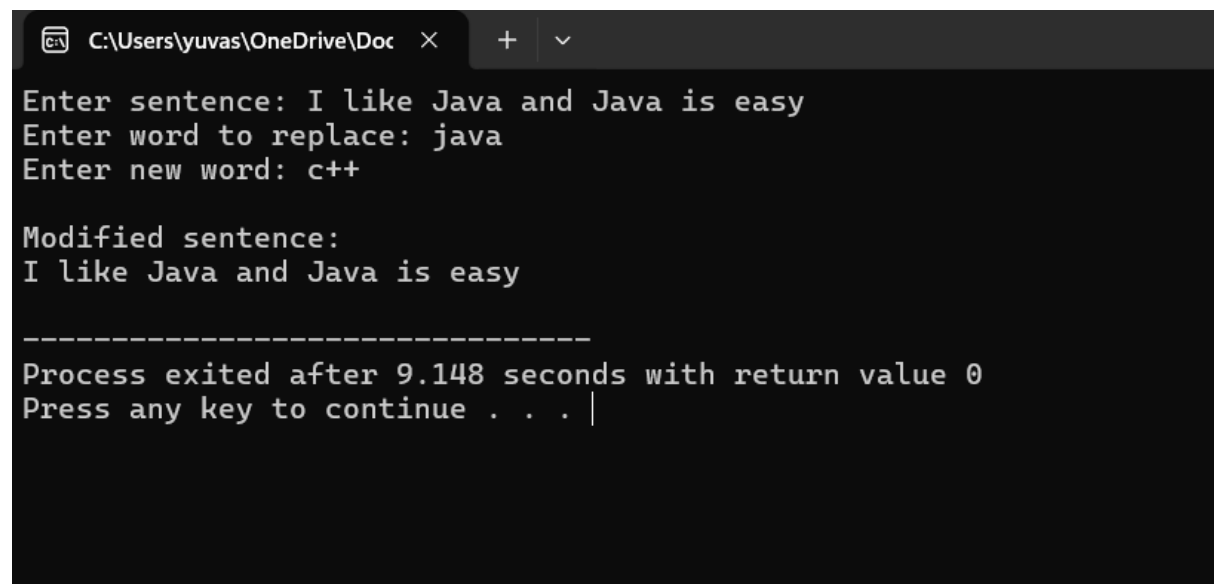

strcat(result, start);

printf("\nModified sentence:\n");
printf("%s\n", result);

return 0;
}

```

Output

```

C:\Users\yuvass\OneDrive\Doc x + v
Enter sentence: I like Java and Java is easy
Enter word to replace: java
Enter new word: c++

Modified sentence:
I like Java and Java is easy
