

36. Basic Mathematical Operations

```
#include <stdio.h>
```

```
int main()
```

```
{
```

```
    float a, b;
```

```
    char op;
```

```
    printf("Enter first number: ");
```

```
    scanf("%f", &a);
```

```
    printf("Enter operator (+, -, *, /): ");
```

```
    scanf(" %c", &op);
```

```
    printf("Enter second number: ");
```

```
    scanf("%f", &b);
```

```
    switch (op)
```

```
{
```

```
    case '+':
```

```
        printf("Result = %.2f\n", a + b);
```

```
        break;
```

```
    case '-':
```

```
        printf("Result = %.2f\n", a - b);
```

```
        break;
```

```
    case '*':
```

```

        printf("Result = %.2f\n", a * b);
        break;

    case '/':
        if (b != 0)
            printf("Result = %.2f\n", a / b);
        else
            printf("Division by zero is not possible.\n");
        break;

    default:
        printf("Invalid operator.\n");
}

return 0;
}

```

Output

```

Enter first number: 20
Enter operator (+, -, *, /): 10
Enter second number: Invalid operator.

-----
Process exited after 19.92 seconds with return value 0
Press any key to continue . . .

```
