

## 27. Convert abc to ABC

```
#include <stdio.h>
```

```
#include <string.h>
```

```
int main()
```

```
{
```

```
    char str[200];
```

```
    int i;
```

```
    printf("Enter a string: ");
```

```
    fgets(str, sizeof(str), stdin);
```

```
    for (i = 0; str[i] != '\0'; i++)
```

```
    {
```

```
        if (str[i] == 'a' &&
```

```
            str[i + 1] == 'b' &&
```

```
            str[i + 2] == 'c')
```

```
        {
```

```
            str[i] = 'A';
```

```
            str[i + 1] = 'B';
```

```
            str[i + 2] = 'C';
```

```
            i += 2;
```

```
        }
```

```
    }
```

```
    printf("Modified string: %s", str);
```

```
    return 0;  
}
```

#### OUTPUT

```
Enter a string: abc is abc  
Modified string: ABC is ABC  
  
-----  
Process exited after 3.395 seconds with return value 0  
Press any key to continue . . . |
```
