

28. Validate Mobile Number

```
#include <stdio.h>

#include <string.h>

#include <ctype.h>

int main()

{

    char mobile[20];

    int i;

    int valid = 1;

    printf("Enter mobile number: ");

    scanf("%s", mobile);

    if (strlen(mobile) != 10)

    {

        valid = 0;

    }

    else if (mobile[0] < '6' || mobile[0] > '9')

    {

        valid = 0;

    }

    for (i = 0; mobile[i] != '\0'; i++)

    {

        if (!isdigit(mobile[i]))

        {

            valid = 0;

        }

    }

}
```

```
        break;
    }
}

if (valid)
    printf("Valid Mobile Number\n");
else
    printf("Invalid Mobile Number\n");

return 0;
}
```

OUTPUT

```
Enter mobile number: 9876543210
