

22. Print All HTML Tags

```
#include <stdio.h>
```

```
#include <string.h>
```

```
int main()
```

```
{
```

```
    char html[] =
```

```
        "<html>\n"
```

```
        "<body>\n"
```

```
        "<h1>My First Heading</h1>\n"
```

```
        "<p>My first paragraph.</p>\n"
```

```
        "</body>\n"
```

```
        "</html>";
```

```
    int i = 0;
```

```
    printf("HTML TAGS:\n");
```

```
    printf("-----\n");
```

```
    while (html[i] != '\0')
```

```
    {
```

```
        if (html[i] == '<')
```

```
        {
```

```
            printf("<");
```

```
            i++;
```

```
            while (html[i] != '\0' && html[i] != '>')
```

```
{  
    printf("%c", html[i]);  
    i++;  
}  
  
if (html[i] == '>')  
{  
    printf(">\n");  
    i++;  
}  
}  
else  
{  
    i++;  
}  
}  
  
return 0;  
}
```
